LA SELVA BIBLIOGRAPHY – THESIS
(Author alphabetical order – Up date March 3, 2009)**

1. Acuña Chinchilla, P. I. 1986. Morfología de Stryphnodendrom [Stryphnodendron] excelsum Harms (Leguminosae, Mimosaceae). Tesis de Licenciatura. Universidad de Costa Rica.
2. Aguilar Amuchastegui, N. 1999. Criterios e indicadores de sostenibilidad ecológica: caracterización de la respuesta de dos grupos de insectos propuestos como verificadores. Tesis de Maestría. CATIE.
3. Alverson, W. S. 1986. Quararibea Aubl. s.l. (Bombacaceae) in Mexico, Central America and the Antilles: a taxonomic study. Ph.D. Dissertation. University of Wisconsin.
4. Ambrose, M. 1994. A growth and yield model for two species of native Costa Rican hardwoods grown in plantation. M.Sc. Thesis. North Carolina State University.
5. Amsberry, Lindsay K. 2003. Dispersers and herbivores: the positive and negative effects of consumers on plants. M.Sc. Thesis. University of Montana.
6. Andersen, H. F. 2007. Is genetic polymorphism in invasive insects reflected in ecology and behavior? The case of Xylosandrus morigerus (Coleoptera: Curculionidae, Scolytinae) in Costa Rica. M.Sc. Thesis. University of Bergen.
7. Anderson Olivas, E. 2004. Ecological and social implications of hydropower development on a neotropical river system, Costa Rica. Ph.D. Dissertation. University of Georgia.
8. Araya Fallas, M. 1998. Depredación de nidadas artificiales en fragmentos de bosque rodeados por monocultivos de banano. Tesis de Maestría. Universidad de Costa Rica.
9. Archibald, S. B. 2007. Climate and species diversity: the Eocene Okanagan highlands insect view. Ph.D. Dissertation. Harvard University.
10. Arnáez Serrano, E. 2005. Fenología y algunos aspectos del desarrollo radicular en Vochysia ferruginea (Botarrama) en Sarapiquí, Heredia, Costa Rica. Tesis de Maestría. Universidad de Costa Rica.
11. Arroyo Mora, J. Pablo. 2008. Natural forest management plans in Costa Rica: A potential framework for assessing tree biodiversity. Ph.D. Dissertation. University of Connecticut .

12. Baechler, B. S. 1987. Paramyxovirus and hematozoan infections in birds of tropical rain forests and agricultural areas of Costa Rica. M.Sc. Thesis. University of Wisconsin.
13. Baker, D. C. 2000. Wood density patterns of young Costa Rican trees in planted and natural forests. M.Sc Thesis. Oregon State University.
14. Beach, J. H. 1983. The evolutionary ecology of flowering plant sexual systems. Ph.D.Dissertation. University of Massachusetts .
15. Beard, F. 1989. The feeding ecology of tropical freshwater fish in three Costa Rican rivers. Tesis de Bachilleato. University of Birmingham.
16. Bell, K. E. 2005. Conservation ecology of amphibians and reptiles in Sarapiquí, Costa Rica: forest fragmentation and long-term population change. MSc. Thesis. Florida State University.
17. Bello y Bello, M. B. 1997. Biología de la dispersión de las Marantaceae en dos selvas tropicales de Costa Rica: interacción con hormigas. Tesis [Licenciatura]. Universidad Autónoma de México.
18. Bellow, J. G. 2000. Canopy variation in overstory species and assessment of light availability for shaded crops in agroforestry systems. M.Sc. Thesis. University of Florida.
19. Bergeson, D. J. 1996. The positional behavior and prehensile tail use of Alouatta palliata, Ateles geoffroyi, and Cebus capucinus. Ph.D. Dissertation. Washington University.
20. Best, L. 1988. A study of the importance of shading in native species trials for reforestation of abandoned pasture in the Sarapiquí region, Costa Rica. B.Sc.Thesis.[Tesis de Bachillerato]. University of Birmingham.
21. Bien, A. R. 1982. Substrate specificity of leafy liverworts (Hepaticae: Lejeuneaceae) in a Costa Rican rain forest. M.S. Thesis. State University of New York.
22. Bigelow, S. W. 1992. Nutrient content and resorption in leaves of tropical wet forest plants of varied stature and life form. M.S. Thesis. University of Florida.
23. Bigelow, S. W. 1998. Stand rotation frequency as a determinant of leaching in the humid tropics. Ph.D. Dissertation. University of Florida.
24. Blankenship, E. L. 1993. The effects of diet on the predatory larva of the smoky jungle frog (Leptodactylidae: Leptodactylus pentadactylus). M.S. Thesis. Auburn University.

25. Bodner, G. S. S. 2002. Biodiversity assessment and systematics of neotropical jumping spiders (Araneae: Salticidae) . Ph.D. Dissertation. University of Arizona.
26. Boyko, A. R. 2005. The evolution of warning coloration in Heliconius butterflies. Ph.D.Dissertation. Purdue University.
27. Boyle, B. L. 1996. Changes on altitudinal and latitudinal gradients in neotropical montane forests. Washington University.
28. Boyle, W. A. 2006. Why do birds migrate? The role of food, habitat, predation and competition. Ph.D. Dissertation. The University of Arizona.
29. Braker, H. E. 1986. Host plant relationships of the neotropical forest grasshopper, Microtylopteryx hebaridi Rehn (Acrididae: Ommatolampinae). Ph.D. Dissertation. University of California.
30. Bratt, A. I. 1991. The influence of canopy gaps on decomposition rates of Pentaclethra macroloba in tropical rainforest. M.S. Thesis. Colorado State University.
31. Breitsprecher, A. A. 1987. Stem-growth periodicity of trees in a tropical wet forest of Costa Rica. Ph.D. Dissertation. University of Washington.
32. Brooke, A. P. 1987. Natural history of the Honduran white bat, Ectophylla alba, in Costa Rica. M.A. Thesis. Boston University.
33. Budowski, G. 1961. Studies on forest succession in Costa Rica and Panama. Ph.D. Dissertation. Yale University.
34. Buhi, C. W. 1997. Soil hydraulic properties in two tropical lowland forests: Jatsun Sacha, Ecuador and La Selva, Costa Rica. M.S. Thesis. University of Tennessee.
35. Burcham, J. 1985. Fish communities and environmental characteristics of two lowland streams in Costa Rica. M.S.Thesis. Texas A&M University.
36. Butterfield, R. 1993. Tropical timber species growth in the Atlantic lowlands of Costa Rica and woody variation of two native species. Ph.D. Dissertation. North Carolina State University.
37. Byrne, M. M. 1991. Ecology and coexistence mechanisms of tropical twig-dwelling ants. M.S. Thesis. University of Florida.
38. Canet-Desanti, L. 2007. Herramientas para el diseño, gestión y monitoreo de corredores biológicos en Costa Rica. Tesis de Maestría. Centro Agronómico Tropical de Investigación y Enseñanza.

39. Cardelús, C. L. 2002. Distribution and abundance of vascular epiphytes in tropical wet forests: a multi-scale approach. Ph.D. Dissertation. University of Connecticut.
40. Carlson, J. E. 2007. Floral traits, pollinator behavior, and plant reproduction: tests of natural and sexual selection in the hummingbird-pollinated herb Chrysothemis friedrichsthaliana. Ph.D. Dissertation. Louisiana State University.
41. Carney, K. M. 2003. The influence of plant diversity and land use on the composition and function of soil microbial communities. Ph.D. Dissertation. Stanford University.
42. Carvajal Vanegas, D. 2004. Intercepción de precipitación en dos especies forestales nativas: Vochysia guatemalensis y Vochysia ferruginea (Vochysiaceae). Tesis de Bachillerato.
43. Casey, M. 1996. Throughfall in a forestry plantation at the La Selva Biological Station, Costa Rica. M.Sc. Thesis. University of Tennessee.
44. Castillo Centeno, V. E. 1986. Factores ecológicos y de mercado de la reproducción de Rhinoclemmys pulcherrima y Kinosternon scorpioides (Testudines: Emydidae y Kinosternidae) en Costa Rica . Tesis de Licenciatura. Universidad de Costa Rica.
45. Castillo Núñez, M. 1999. Creación y validación de un mapa de cobertura vegetal, usando imágenes del satélite Landsat 5, en Puerto Viejo de Sarapiquí. Tesis de Bachillerato. Instituto Tecnológico de Costa Rica.
46. Cavaleri, M. A. 2007. Ecosystem respiration and foliar morphology of a primary tropical rain forest: the effects of canopy structure and environmental radiants. Ph.D. Dissertation. Colorado State University.
47. Chaverri E., P. 1992. Diagnóstico preliminar de microorganismos patógenos en doce especies forestales nativas de la Región Huetar Norte de Costa Rica. Tesis de Bachillerato. Instituto Tecnológico de Costa Rica.
48. Chazdon, R. L. 1984. Ecophysiology and architecture of three rain forest understory palm species. Ph.D. Dissertation. Cornell University.
49. Chehrezad, D. 2005. Effects of management on Lepidoptera and parasitoids in tropical banana agroecosystems. M.Sc. Thesis. San José State University.
50. Chen, S. H. 2001. Cytogenetic study of the lower Central American frogs of the subgenus Craugastor (Anura: Leptodactylidae: Eleutherodactylus). Ph.D. Dissertation. University of Miami.

51. Chun, Sara L. M. 2008. The utility of digital aerial surveys in censusing Dipteryx panamensis, the key food and nesting tree of the endangered great green macaw (Ara ambigua) in Costa Rica. Ph.D. Dissertation. Duke University.
52. Cifuentes Jara, Miguel. 2008. Aboveground biomass and ecosystem carbon pools in tropical secondary forests growing in six life zones of Costa Rica. Ph.D. Dissertation. Oregon State University.
53. Clark, M. L. 2005. An assessment of hyperspectral and lidar remote sensing for the monitoring of tropical rain forest trees. Ph.D. Dissertation. University of California.
54. Corella Rodríguez, O. 2001. Elaboración de un mapa histórico del cambio de uso del suelo en la Estación Biológica La Selva, Puerto Viejo de Sarapiquí, Heredia. Tesis de Bachillerato. Instituto Tecnológico de Costa Rica.
55. Corrales Molina, L. F. 1986. Patrones espacio-temporales de la floración de especies de Heliconia en Costa Rica: la dinámica del polen y de explotación del néctar por colibríes. Tesis de Maestría. Universidad de Costa Rica.
56. Crawford, A. J. 2000. The evolution and maintenance of a color pattern polymorphism in neotropical frogs. Ph.D. Dissertation. University of Chicago.
57. Cunningham, S. A. 1995. The reproductive ecology of Calyptrogyne ghiesbreghtiana: a rain forest understory palm. Ph.D. Dissertation. University of Connecticut.
58. Dauphin López, G. 2000. The Genus Ceratolejeunea Jack & Steph. (Hepaticae: Lejeuneaceae) in tropical America. [Ph.D. Dissertation] . Georg-August-Universität zu Göttingen.
59. De La Fuente, M. A. S. 1995. Sources of variation in the efficacy of ant-tended extrafloral nectaries as an antiherbivore defense for Stryphnodendron microstachyum Poeppig & Endl. M.S. Thesis. University of Missouri.
60. Delgado Hidalgo, G. 1997. Impacto de sistemas mixtos y de monocultivo de especies forestales nativas sobre las poblaciones de artrópodos del mantillo. Tesis de Licenciatura. Universidad de Costa Rica.
61. Deuth, D. A. 1980. The protection of Cassia fruticosa (Leguminosae) from herbivores by ants foraging at the foliar nectaries. M.A. Thesis. University of Colorado.

62. DeWalt, S. J. 2003. The invasive tropical shrub Clidemia hirta (Melastomataceae) in its native and introduced ranges: Tests of hypotheses of invasion. Ph.D. Dissertation. The Louisiana State University and Agricultural & Mechanical College.
63. Donnelly, M. A. 1987. Territoriality in the poison-dart frog Dendrobates pumilio (Anura: Dendrobatidae). Ph.D. Dissertation. University of Miami.
64. Drake, J. B. 2001. Estimation of tropical forest aboveground biomass using large-footprint lidar (Costa Rica). Ph. D. Dissertation. University of Maryland.
65. Drewe, K. E. 2003. Insectivore to frugivore: Ontogenetic changes in gut morphology and digestive enzyme activity in the characid fish Brycon guatemalensis from Costa Rican rain forest streams . M.Sc. Thesis. California State University at Fullerton.
66. Dunn, R. R. 2003. Fauna in an abandoned landscape: Animal responses to tropical forest regeneration at multiple scales. Ph.D.Dissertation. The University of Connecticut.
67. Dupuy, J. M. 2000. Dynamics of woody seedling and sapling recruitment in second-growth tropical wet forests: an experimental approach. Ph. D. Dissertation. University of Connecticut.
68. Dyer, L. A. 1994. Lepidopteran larval defenses against predators in tropical and temperate systems: the importance of diet breadth and chemistry. Ph.D. Dissertation. University Colorado.
69. Engelbrecht, B. M. J. 1998. Ökologie und Ökophysiologie von koexistierenden Piper - Arten im Unterwuchs tropischer Regenwälder. Ph.D. Dissertation. Technischen Universität Darmstadt.
70. Enríquez-Rocha, P. L. 1995. Abundancia relativa, uso de habitat y conocimiento popular de los Strigiformes en un bosque húmedo tropical en Costa Rica. Tesis de Maestría. Universidad Nacional.
71. Espinoza, F., and R. E. Owens. 2007. Identifying roads and trains under canopy using lidar. M.Sc.Thesis. Naval Postgraduate School .
72. Evans, S. 1997. The green republic: a conservation history of Costa Rica, 1838-1996. Ph.D. Dissertation. University of Kansas.
73. Fallas Castillo, A. 1997. Diagnóstico de las poblaciones de insectos herbívoros asociados a dos especies forestales Hyeronima alchorneoides Allemao y Pentaclethra macroloba (Will) Ktze. Puerto Viejo de Sarapiquí, Heredia .Tesis de Bachillerato. Instituto Tecnológico de Costa Rica.

74. Ferris, J. S. 1997. Landscape analysis of a lowland tropical forest based on remotely sensed spectral reflectance and thermal response characteristics. Ph.D. Dissertation. University of Georgia.
75. Flietner, D. W. 1987. Root distribution of two communities in abandoned pastures in the humid tropics. M.S. Thesis. University of Florida.
76. Flores Llampá, B. 2005. Efectos de la fragmentación del hábitat sobre la ecología reproductiva de Quararibea ochrocalyx (K. Schum) Vischer en el bosque húmedo de Costa Rica. Tesis de Maestría . CATIE.
77. Franz, N. M. 1999. Biología reproductiva de algunas ciclantáceas (Cyclanthaceae) y de los picudos asociados (Coleoptera: Curculionidae). Tesis de Maestría. Universidad de Costa Rica.
78. Frolking, S. E. 1993. Modeling soil climate controls on the exchange of trace gases between the terrestrial biosphere and the atmosphere. Ph.D. Dissertation. University of New Hampshire.
79. Gallery, R. E. 2007. Seed banks, seed mortality, and the role of fungal communities in neotropical forests. Ph.D. Dissertation. University of Illinois.
80. Garrison, J. S. E. 1995. Traplining foraging behavior in a tropical hummingbird species Phaethorhis superciliosus. M.S. Thesis. University of British Columbia.
81. Gentry, A. H. 1969. Tabebuia (Bignoniaceae) in Central America. M.S. Thesis. University of Wisconsin.
82. Gentry, G. L. 1998. Mutualistic interactions between parasitoids and a neotropical extrafloral nectary plant in the Solanaceae. Ph.D. Dissertation. University of California.
83. Gerwing, J. J. 1993. Competitive effects of monocultures and a polyculture of three tropical tree species on understory plant growth. M.Sc. Thesis. University of Florida.
84. Goldwasser, L. P. 1987. I. Branching patterns, generating rules, and astogenetic trajectories in Bugula (Cheilostomata, Bryozoa). II. Mutualism and its ecological and evolutionary consequences. Ph.D. Dissertation. University of California.
85. González Jiménez, E. 1996. Tropical tree species for reforestation: studies on seed storage, foliar nutrient content and wood variation. Ph.D. Dissertation. Texas A&M University.

86. Graham, D. L. 1996. Interactions of understory plants and frugivorous birds in a lowland Costa Rican forest. Ph.D. Dissertation. University of Miami.
87. Gray, A. R. 2001. Investigations of visual and acoustic communications in the Neotropical frog Agalychnis calcarifer. M.Phil [Master Thesis]. University of Manchester.
88. Green, G. C. 1989. Conservation projects in Central America: an analysis to determine the ingredients for success. Ph.D. Dissertation. Oxford University.
89. Greig, N. 1991. Ecology of co-occurring species of neotropical Piper (Piperaceae): distribution, reproductive biology, and seed predation. Ph.D. Dissertation. University of Texas.
90. Grove, K. F. 1985. Reproductive biology of neotropical wet forest understory plants. Ph.D. Dissertation. University of Iowa.
91. Guevara Líos, C., and N. Zamora Cervantes. 1997. Evaluación del crecimiento y productividad de cinco especies nativas plantadas en Sarapiquí, Heredia, Costa Rica. Tesis de Licenciatura. Universidad Nacional.
92. Gush, T. J. 1983. Chemical variation in the defensive secretion of four species of Nasutitermes (Isoptera, Termitidae). M.A.Thesis. State University of New York.
93. Gutiérrez Vásquez, C. A. 2000. Efecto de la historia geológica del suelo y la topografía sobre la distribución de palmas en un bosque húmedo tropical en Costa Rica. [Tesis de Licenciatura]. Universidad de Antioquia.
94. Guyer, C. 1986. The role of food in regulating population density in a tropical mainland anole, Norops humilis. Ph.D. Dissertation. University of Miami.
95. Guzmán Alvarez, J. A. 1999. Red de drenajes extraída de un modelo de elevación digital, generado con elevaciones de un altímetro-ratreador laser (L VIS), en la Estación Biológica La Selva, Sarapiquí. Tesis de Bachillerato. Instituto Tecnológico de Costa Rica.
96. Haber, W. A. 1978. Evolutionary ecology of tropical mimetic butterflies (Lepidoptera: Ithomiinae). Ph.D. Dissertation. University of Minnesota.
97. Hammel, B. E. 1984. Systematic treatment of the Cyclanthaceae, Marantaceae, Cecropiaceae, Clusiaceae, Lauraceae and Moraceae for the flora of a wet lowland tropical forest, Finca La Selva, Costa Rica. Ph.D. Dissertation. Duke University.

98. Hanson, T. 2006. Effects of habitat fragmentation on the reproductive ecology and conservation genetics of the almendro (Dipteryx panamensis), a keystone rainforest tree. Ph.D. Dissertation. University of Idaho.
99. Hartshorn, G. S. 1972. Ecological life history and population dynamics of Pentaclethra macroloba, a tropical wet forest dominant and Stryphnodendron excelsum, an occasional associate. Ph.D. Dissertation. University of Washington.
100. Hazlett, D. L. 1981. Change in structure, growth, and decomposition during succession in a species-rich forest in Honduras. Ph.D. Dissertation. University of Washington.
101. Heaney, A. 1988. Ecological studies in six forests at a range of altitudes on Volcán Barva, Costa Rica. M.Sc. Thesis. University of Stirling.
102. Heckel, G. 2000. Mating system and reproductive tactics in the white-lined bat, Saccopteryx bilineata (Emballonuridae). Ph.D. Dissertation. University of Erlangen-Nürnberg.
103. Herrera Rodríguez. M. 2008. Sustainable development in Costa Rica: a moral geography. Ph.D. Dissertation. University of Kansas.
104. Hilje Rodríguez, B. 2004. Distribución y abundancia de anfibios en bosques tropicales húmedos con diferente estado de sucesión, Estación Biológica La Selva, Sarapiquí, Costa Rica. Tesis de Licenciatura. Universidad de Costa Rica.
105. Hines, K. N. 2000. Variation in vocalizations of male Dendrobates pumilio from La Selva, Costa Rica. M.Sc. Thesis. Florida International University.
106. Hiremath, A. J. 1999. Nutrient use efficiency in simplified tropical ecosystems. Ph.D. Dissertation. University of Florida.
107. Hummel, S. 1997. Stand development of Cordia alliodora (Boraginaceae), a neotropical secondary forest tree in Northern Costa Rica (1992-1996). Ph.D. Dissertation. Oregon State University.
108. Huston, M. A. 1982. The effect of soil nutrients and light on tree growth and interactions during tropical forest succession: experiments in Costa Rica. Ph.D. Dissertation. University of Michigan.
109. Inouye, B. D. 1998. The role of aggregation at nested spatial scales for the coexistence of competitors . Ph.D. Dissertation. Duke University.

110. Iriarte, S. V. 2001. Seedling growth and survivorship on native tree species in response to light heterogeneity in wet second-growth forests of Northeastern Costa Rica. Ph.D. Dissertation. University of Connecticut.
111. Irons, J. G. III. 1993. Latitudinal gradients in leaf litter decomposition in streams: effects of leaf chemistry and temperature. Ph.D. Dissertation. University of Alaska.
112. Janos, D. P. 1975. Vesicular-arbuscular mycorrhizal fungi and plant growth in a Costa Rican lowland rainforest. Ph.D. Dissertation. University of Michigan.
113. Janovec, J. P. 2000. A systematic study of Compsooneura (A. DC.) Warb., a neotropical member of the nutmeg family (Myristicaceae). Texas A&M University.
114. Joerger, A. G. 1991. Central Volcanic Cordillera Biosphere Reserve - La Selva Biological Station - Environmental Education Center. M.S.Thesis. Cornell University.
115. Johnson, D. M. 2003. Spatial analyses of a neotropical beetle: Cephaloleia fenestrata. Ph.D. Dissertation. University of Miami.
116. Johnson, D. W. 1975. Processes of elemental transfer in some tropical, temperate, alpine and northern soils. Ph.D. Dissertation. University of Washington.
117. Jones Román, G. 2000. Regeneración temprana de dos especies arbóreas de semilla grande en bosques fragmentados de la Zona Norte de Costa Rica . Tesis de Maestría. CATIE.
118. Jordan, M. T. 2003. Effects of interbasin groundwater transfer on water and chemical budgets in lowland tropical watersheds - La Selva, Costa Rica. M.Sc.Thesis. North Carolina State University.
119. Joyce, A. T. 1967. Aerial photographic interpretation of tropical vegetation in Costa Rica. M.S.Thesis. Pennsylvania State Univ.
120. Judziwicz, E. J. 1985. Revision of Pharus (Poaceae). M.S. Thesis. University of Wisconsin.
121. ———. 1987. Taxonomy and morphology of the tribe Phareae (Poaceae: Bambusoideae). Ph.D. Dissertation. University of Wisconsin.
122. Juncosa, A. M. 1982. Embryo and seedling development in the Rhizophoraceae. Ph.D. Dissertation . Duke University.

123. Kaspari, M. 1992. Niche relationships in an assemblage of neotropical granivorous ants. Ph.D. Dissertation. The University of Arizona.
124. Kennedy, L. M. 1998. Prehistoric agriculture, fires, and droughts at the La Selva Biological Station, Costa Rica: paleoecological evidence from the Cantarrana swamp. M. Sc. Thesis. University of Tennessee.
125. Kitasako, J. T. 1967. Observations on the biology of Dendrobates pumilio Schmidt and Dendrobates auratus Girard. M.S.Thesis. University of Southern California.
126. Kluge, J. 2005. Diversity, distribution patterns and morphological characteristics of pteridophytes along an elevational gradient in Costa Rica. Ph.D. Dissertation. University of Göttingen.
127. Kobe, R. K. 1995. Scaling from individuals to forest communities and landscapes with models of juvenile tree growth and mortality. Ph.D. Dissertation. University of Connecticut.
128. Kolmer, Kerstin. 2002. Co-operation and conflict in societies of the ponerine ant genus Pachycondyla. Ph.D.Dissertation. Julius-Maximilian-University Würzburg.
129. Kress, W. J. 1981. Reproductive biology and systematics of Central American Heliconia (Heliconiaceae). Ph.D. Dissertation. Duke University .
130. La Pierre, L. M. 2002. Diversity and ecology of insect herbivores associated with Cecropia (Cecropiaceae) in Costa Rica and their relationship with its Azteca (Hymenoptera: Formicidae) mutualists. Ph.D. Dissertation. University of California.
131. Laidlaw, K. L. 1996. The implementation of a volunteer stream-monitoring program in Costa Rica. M.Sc. Thesis. University of Georgia.
132. Le Corff, J. 1992. The significance of a mixed reproductive strategy in an understory tropical herb, Calathea micans (Marantaceae). Ph.D. Dissertation. University of Miami.
133. Leiva Sanabria, J. A. 2001. Comparación de las estrategias de regeneración natural entre los bosques primarios y secundarios en las zonas bajas del Atlántico costarricense: Estación Biológica La Selva, Puerto Viejo de Sarapiquí, Heredia . Tesis de Bachillerato. Instituto Tecnológico de Costa Rica.
134. Levey, D. J. 1986. Fruit-frugivore interactions in a Costa Rican rain forest. Ph.D. Dissertation. University of Wisconsin.

135. Li, M. 1991. The ecology of neotropical forest tree seedlings. Ph.D. Dissertation. University of North Dakota.
136. Lieberman, S. S. 1982. The ecology of the leaf litter herpetofauna of a neotropical rain forest: La Selva, Costa Rica. Ph.D. Dissertation. University of Southern California.
137. Limerick, S. 1976. Dietary differences of two sympatric Costa Rican frogs. M.S. Thesis. University of Southern California.
138. Lobo Cabezas, S. 1998. Remoción de frutos y supervivencia de plántulas de Dipteryx panamensis (Pittier) Record, en un bosque lluvioso tropical: I. Efecto de los mamíferos terrestres sobre la remoción de los frutos. II. Supervivencia de las plántulas. Tesis de Maestría. Universidad de Costa Rica.
139. Loescher, H. W. 2002. Ecosystem-level responses of carbon and energy from a tropical wet forest in Costa Rica . Ph.D. Dissertation. University of Florida.
140. Loiselle, B. A. 1987. Birds and plants in a neotropical rain forest: seasonality and interactions. Ph.D. Dissertation. University of Wisconsin.
141. Lopes, E. C. 2005. Wood and soil-atmosphere CO₂ fluxes from a tropical forest ecosystem. M.Sc. Thesis. University of New Hampshire.
142. López Gutiérrez, J. E. 1996. Hábitos alimentarios de murciélagos frugívoros y su participación en la dispersión de semillas, en bosques secundarios húmedos de Costa Rica. Tesis de Maestría. Universidad Nacional.
143. Luvall, J. C. 1984. Tropical deforestation and recovery: the effects on the evapotranspiration process. Ph.D. Dissertation. University of Georgia.
144. Lücking, R. 1990. Zur Taxonomie und Pflanzengeographie blattbewohnender Flechten in Costa Rica, Zentralamerika. Thesis, Diplomarbeit Biol [Tesis Bachillerato]. Ulm Universität .
145. MacDougal, J. M. 1983. Revision of Passiflora L. Section Pseudodysomia (Harms) Killip emend. J. MacDougal, the hooked trichome group (Passifloraceae). Ph.D. Dissertation. Duke University .
146. Maiocco-Nosetto, D. C. 1998. Distribución de Zamia skinneri, un producto no maderable de los bosques de Centro América. Tesis de Maestría. Centro Agronómico Tropical de Investigación y Enseñanza.
147. Mariscal Chavez, A. G. 1998. Efecto de plantaciones forestales sobre la calidad de regeneración leñosa en la Estación Biológica La Selva, Costa Rica. Tesis de Maestría. CATIE.

148. Maroto V., O. 1990. Aportes para un sistema de inventario forestal continuo dentro de la Fase II del Proyecto de Ensayos Forestales de la Organización para Estudios Tropicales, Sarapiquí, Heredia, Costa Rica. Tesis de Bachillerato. Instituto Tecnológico de Costa Rica.
149. Marquis, R. J. 1984. Herbivory as a selective force in Piper arieianum C.DC. (Piperaceae). Ph.D. Dissertation. University of Iowa.
150. Martínez R., M. 1991. Patrones, procesos y mecanismos en la comunidad de plántulas de una selva húmeda neotropical. Ph.D. Dissertation. Universidad Nacional Autónoma de México.
151. Marín León, R. 1990. La conservation de la nature dans une perspective de développement durable: le cas du Costa Rica. M.Sc. Thesis. Université du Québec.
152. Massa, G. W. 1996. Factors affecting the distribution of a neotropical hemiepiphyte. M.Sc. Thesis. San José State University.
153. McCaffrey, D. 1969. Management of laurel (Cordia alliodora) on farms in Sarapiquí, Costa Rica. M.S. Thesis. Syracuse University.
154. McCormick, S. 1982. Flavonoid chemistry of Passiflora subgenus Plectostemma. Ph.D. Dissertation. University of Texas.
155. McDade, L. A. 1980. Systematics and reproductive biology of the Central American species of the Aphelandra pulcherrima complex (Acanthaceae). Ph.D. Dissertation. Duke University.
156. McDonald, E. P. 1993. Light effects on physiological characteristics of tropical tree and shrub species of Miconia. Ph.D. Dissertation. Duke University.
